Teksal Safety

Providing the best safety solutions together

About Teksal Safety

Teksal Safety delivers solutions that optimise safety during plant operations and maintenance in a range of industrial environments, including process plants, mine sites, factories, industrial facilities and worksites. Employing best practice and custom solutions, Teksal helps clients protect their people and assets from process, machinery and industrial hazards.

Teksal Safety provides sensors, instruments, controls and tools to manage risks through design and operate plant and equipment safely and efficiently. They also create a visual workplace using hazard and facility identification systems, provide dropped object controls and tailored solutions to isolate hazardous energy sources.

Products

- Safe machine isolation & access control
- Safety gate switches & interlocks
- Safe sequential operation of equipment
- Mechanically safeguard dangerous machines & hazardous processes
- Customised & modular solutions

Key Industries

- Oil
- Gas
- Mining

Working together

Our Partnership

Teksal Safety has built a long-term partnership with Fortress since 2002. They work collaboratively with us to supply and support trapped key interlocks, access control products, and fluid power safety solutions.

Favourite Product Range

As part of our high voltage and distribution interlocking and machine safety solutions, Teksal Safety regularly supplies and, as needed, customises products from the mGard and amGard ranges, which integrate well with their other access control safety networks solutions. Focused on product innovation and industry changes, Teksal Safety is always keen to work collaboratively with Fortress to create bespoke solutions for its mining and industrial clients.

Most interesting project with Fortress

Teksal Safety has enjoyed decades of helping protect their clients people, plant and process, primarily with Fortress' high voltage and distribution interlocking solutions. Our combined 60 years' experience in interlocking enables them to consistently deliver a range of Fortress products in isolation or with complementary products, to provide bespoke solutions.

Channel Partner Profile

Teksal Safety

Providing the best safety solutions together

Testimonial

We've been partnering with Teksal Safety for over 20 years, and their reliability and knowledge have been invaluable to our business. They've always gone above and beyond to ensure we receive the best possible support. We are deeply grateful for their dedication and look forward to many more years of partnership.

Kim McKay,
General Manager Australia,
Fortress Safety

Moving forward

Current challenges in the market

Industry fluctuations are always challenging, and the emergence of new markets presents both opportunities and challenges. Knowing they supply and support Fortress' high-quality products, backed by our leading-edge technology and their team's industry knowledge and experience, means they are more than equipped to meet these challenges and opportunities, while learning, evolving and diversifying along the way.

Exciting plans for this year

Teksal Safety regularly participate in local / domestic trade shows, such as the Institute of Instrumentation of Automation and Control (IICA)'s technical expos around Australia, and other industry events, including the Mine & Electrical Association events in Queensland and Western Australia, the Queensland Mining Industry Health and Safety Conference, and ProSafe in Victoria.

As the industry evolves, presenting new market challenges and opportunities, they, too, are keen to evolve and diversify their offering to meet their customers' evolving needs, and working in collaboration with Fortress to develop bespoke solutions that address these changes.

Focused on safety

As the cornerstone of Teksal Safety's machine and automation safety solutions, Fortress' products align with the company's overall ethos to protect its clients' people, plant and process.

As a long-term channel partner with Fortress, uniquely placed in its industry in Australia, Teksal Safety looks forward to continuing to support its customers to help them protect their people, plant and process, through Fortress' range of machine and automation safety solutions. For more information about Fortress machine and automation safety solutions, email sales@teksal.com.au.

OUR SOLUTIONS

MACHINE & AUTOMATION SAFETY

- Perimeter guarding of machines
- Interlocks & access controls
- Safety of oil systems & PLCs
- Emergency stop controls
- Laser imaging sensors
- Interlocks
